129.767,91 € per ASP**

Financing program:

**AMIF – Migration and
Integration Asylum Fund 2021-
2027**

Local initiatives generating networks for the autonomy of refugees

OBJECTIVE

The project aims to **strengthen and improve a community network and a service system to promote the social and economic integration** of people leaving SAI reception centres, with a focus on vulnerable individuals and families. It promotes **coordination between public and private actors** to make social protection tools more effective and reduce marginalisation and hardship. The actions, consolidated as shared institutional practices, will over time create conditions for the autonomy and full integration of third-country nationals.

ACTIVITIES

The project activities include **testing new housing integration models** for project beneficiaries; furthermore, **integrated care pathways will be activated** to promote the socio-economic integration of beneficiaries through a multidisciplinary and multidimensional approach.

In addition, the **foreign nationals help desk dedicated to project beneficiaries will be strengthened**, with tasks including service orientation and legal support.

Finally, **sharing and promotion activities** will be carried out, both within the network and towards the entire citizenry.

EXPECTED RESULTS

The **improvement of the socio-economic integration system for third-country nationals** leaving the Sai reception system.

Strengthening the chain of local services for taking charge of beneficiaries, as well as **increasing local inclusion potential**.

Enhancing social and community networks by encouraging the **active participation of civil society** in building a positive environment for the integration of third-country nationals who are beneficiaries of the project activities.

Gradually empowering beneficiaries in developing independent parenting and interaction skills and ensuring them proper access to local services.
